\*Point values for each hitter beyond the nine regulars may be set using one of the following two ways:

- **List players as backup hitters.** The point value for a backup hitter is calculated at one-fifth of the player's total point value. Backup hitters may be used as pinch hitters at any time, but they may only remain in the lineup after the third out if they enter the game after the 6th inning.
- **List players as additional regulars.** The point value for an additional regular is calculated at the player's full point value. Additional regulars may replace players in the starting lineup at any time, and stay in the game.
- All backup players at Limited tournaments are calculated at full value.

**Total Point Value for all Hitters:**

**TOTAL TEAM POINT VALUE:**

*A team's total point value in a Constructed event must not exceed 5,000 points.*
